

Hat Order Information Booklet

Please email getoutsidecongo@gmail.com with any questions you may have after reading this booklet.

Let's get your custom hat started!

This booklet is very important to ensure you end up with a beautiful, and unique custom made hat that fits you and represents you perfectly.

After you have completed your order form and are happy with your quote, you must pay your deposit through the website. Once deposit has been made I will get in touch to schedule a design consultation either in person or video chat depending on your location.

The consult will allow me to get to know you better, show you some different materials and designs as well as confirm all ideas and double check hat sizing.

Please have some ideas in mind prior to your consult as well as emailing through any photos and style ideas to me at getoutsidecngo@gmail.com.

Things to think of before your design consult:

How would you like your brim and crown shaped?

How wide do you want your brim?

What aesthetic are you going for?

What styles of mine do you love the most and want to see in your hat?

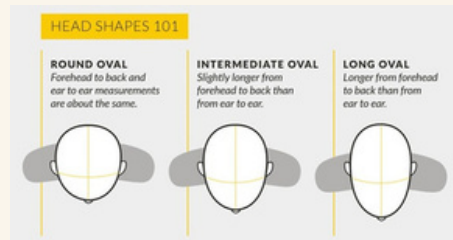

Think of ordering a custom hat like; commissioning a painter. You provide me with the vibe, colour palette, aesthetic and and important touches and I then collaborate with you to develop a unique piece of wearable art perfectly suited for you.

Measuring your head!

Please be very particular and meticulous with this part as it will ensure you have the perfect fitting hat! This is the most important step of the process.

You want to measure your head circumference in Centimetres to the nearest decimal, for example 58.2 cm. Use a sewing measuring tape if possible and make sure it's accurate. Triple check this measurement as it's VERY important!

Make sure you go around the largest part of your skull or where you would like the hat to sit: approx 2 cm above your eye brows and top of your ears as well as over the orbital bone in the back of your head that sticks out.

Please also let me know if your head is more round, oval or long oval. You will find this out by having someone else look down on your head from above or taking a photo. I also now have a custom fitting hat device that I can resize your hat with after it's made to make sure it fits your head exactly, discuss this with me on our phone call if your interested.

Here's a video for measuring
<https://youtu.be/pWv7VsIhKq8>

We can also measure your head together on video chat if you have any troubles at all with this.

Think of your hats like a new pair of boots. Might be a bit tight and slightly uncomfortable at first but once the leather ages and felt moulds to your head the initial tightness will insure the hat doesn't blow off with every gust of wind.

Unfortunately, there is no returns or exchanges on custom hats that don't fit as you are responsible for ensuring you have measured correctly. I measure each hat before it leaves the workshop to ensure no shrinking has happened while creating. If you need me to resize your hat 1- possibly 2 sizes you will need to pay for postage and a resizing fee of \$25. Please contact Myia via e-mail on getoutsidecongo@gmail.com if you have any issues with the above.

Rabbit Felt Colours

Beaver Felt Colours

EST 2020.

Hat Price List
